QUICK START USER GUIDE
PIXIE DRONE

BEFORE FIRST USE

Please read this user guide carefully to learn key best practices. **Beware that this guide is not a substitute of the technical notice.**

Unloading and Charging

- Unload the Drone
- Place it on a soft surface to avoid scraping the hull.

Charge the drone overnight, batteries must be charged 100% before first use.
At least two people are necessary to carry the drone.

Button layout on the remote

**Standby mode** : allows to charge the drone

On mode : is when the thrusters and cameras are on. Do not transport or charge the Pixie Drone in this mode.

Beware : Do not transport, charge, perform any maintenance or touch thrusters when the on mode is activated

Starting the drone

1. Release the **Off button**
2. Press the **On button for 10 seconds.** The **On button** must remain blue. **Standby mode** is activated
3. Start the remote : press the **On button,** the remote will connect to the drone
4. A loading bar appears: the drone and remote are connecting

5. The loading bar disappears. The drone and remote are connected.
6. Press the **C button.** This button allows you to go from **Standby mode** to **On mode**
7. The Drone beeps
8. The beeping stops, the drone is ready to be set into action.

Maintenance recommandations

Cleaning

Rinse the drone with clear water after each use. We recommend using a soft sponge with soap.

In the event of a prolonged stop - *over 1 month* :

- clean the drone
- charge the batteries prior
- charge the batteries every month

Storing

Strictly store in a dry environment.
We recommend storing the drone on a soft surface
Temperature strictly must remain between **0 and 40°C. // 32 and 104°F**
BEWARE: Below 0°C / 32°F, batteries won't be able to charge.
